CALL FOR PROPOSALS: EVALUATING THE WETLAND REHABILITATION FOR CLIMATE CHANGE ADAPTATION PROJECT (BMZ PROJECT) FOR THE ENVIRONMENTAL PLANNING AND CLIMATE PROTECTION DEPARTMENT, ETHEKWINI MUNICIPALITY

PQ NO: 7N-30307

1. Purpose

The purpose of the current Terms of Reference is to appoint a suitably qualified service provider to evaluate the “Wetland Rehabilitation for Climate Change Adaptation Project” (the BMZ project).

2. Background

The uMhlangane catchment represents a microcosm of the developmental challenges faced by Durban, and is characterised by a poorly functioning river system, high levels of environmental degradation, and high levels of poverty and unemployment. On top of this, there is little integration of project activities within the catchment, resulting in an inefficient use of city resources. Climate change will exacerbate all of these challenges. To address this, eThekweni Municipality initiated the uMhlangane Climate Change Adaptation Programme, a cross sectoral initiative aimed at enhancing climate adaptation in the catchment through relevant biophysical and socio-economic interventions. The ‘Wetland Rehabilitation for Climate Change Adaptation project’ was initiated as a component of this broader initiative and aims to bring a number of municipal sectors together to work towards rehabilitating key wetlands and surrounding open spaces in the Riverhorse Valley area in the uMhlangane catchment. Municipal sectors that are involved in this work include:

- The **Environmental Planning and Climate Protection Department** which currently coordinates this cross-sectoral programme.
- The **Coastal Stormwater and Catchment Management Department** which focuses on wetland rehabilitation and stormwater management. The intention of restoring the wetland in this area is to mitigate the impacts of flooding and to improve water quality in the river downstream.
- **Economic Development Unit’s ‘Green Corridor Project’**. As part of the wetland restoration work, management of surrounding areas of alien plant infestation is also critical. Teams made up of members from local communities are currently undertaking this work. Job creation and

training through the above-mentioned projects is seen as a critical cross-cutting issue. Wherever possible, projects are designed to maximize the number of people that can be employed.

- **EThekwini Water Services Unit.** An advanced water quality monitoring station is being tested downstream of the Northern Wastewater treatment works. This will allow the impact of activities in the catchment to be monitored more carefully. The intention is to upscale this project to other catchment areas.

In order to successfully implement the Wetland Rehabilitation for Climate Change Adaptation project significant funds were needed. The Federal Ministry for Economic Cooperation and Development (BMZ) in Germany is the main funder of the project, with additional co-funding being provided by the Free Hanseatic City of Bremen and eThekwini Municipality. The project started in 2013 and will run until December 2016.

As part of the contractual agreement for the project a range of reports are required to ensure that funds are being spent in the most effective and beneficial manner e.g. quarterly reports, annual reports, financial annual plans, etc. In addition to this it is required that a final evaluation of the BMZ project (which comprises of the following 4 sub-projects; wetland rehabilitation, invasive alien clearing, water quality monitoring and communication) is carried out by an external service provider. The outcomes of this evaluation could add value to future projects within the eThekwini Municipality with a similar focus.

The figure above shows the extent of the uMhlangane Catchment

3. Scope of work

The successful service provider will be required to manage, coordinate and facilitate the evaluation of the BMZ Project. This includes but is not limited to:

(1) Reviewing the relevant BMZ Project Documents for context purposes only

- a. Background documents e.g. contract between eThekweni Municipality and Bremen and original funding proposal (which contains details of project objectives and measures)
- b. Reports i.e. quarterly and annual reports for the project's duration
General e.g. documentation generated during scheduled engagements e.g. monitoring visits, meeting minutes, project inception meetings, etc.

(2) Reviewing project achievements against original project objectives

Conduct an independent assessment of whether:

- a. The BMZ project objectives have been achieved in relation to the indicators that were set at the onset of the BMZ project (which include measures and activities) and if not for which reasons.
- b. The indicators and monitoring mechanisms used were appropriate in terms of evaluating the project deliverables against the broader BMZ project objectives.

(3) Consolidating and documenting the key lessons learnt regarding

- a. The key technical learning's that may have emerged from the sub-projects that are more broadly applicable to others within eThekweni municipality wanting to implement projects of a similar nature
- b. The management of a cross-sectoral team for the BMZ project implementation: What has been achieved? What are the benefits? What have the challenges been?
- c. Any unexpected outcome (positive and negative) from the BMZ project or sub-projects i.e. those things that were done or learned that were not directly linked to the original project objectives.
- d. What the BMZ Project Team would have (a) kept the same and (b) done differently if the project were to be repeated.
- e. The international funding of BMZ: What were the challenges? What advantages did the international funding bring?
- f. The partnership with Bremen: What were the challenges? What advantages did the partnership bring?

(4) Relevance of original BMZ project objectives

- a. Did the project objectives meet the needs of the target groups (local population, municipality)?
- b. To what extent are the objectives of the project still valid today? Would you choose other objectives from today's point of view?

(5) Understanding the sustainability of the project

- a. To what extent are the projects sustainable and what is being put in place (if anything) to continue the work?

- b. Comment on the potential opportunity to leverage, upscale or integrate the outcomes or learning's from this work into future climate work within the municipality.

As part of this it is anticipated that the service provider will:

- Liaise with relevant municipal officials and the Bremen project management team to ascertain relevant information to address the areas listed above e.g. site visits, interviews (individual or group), standardized questionnaires, meetings, workshop, Skype calls etc.
- Manage the coordination of the evaluation i.e. setting up of interviews, meetings, etc.

Please note that your proposed budget should at a minimum make allowance for one full day workshop with catering (2 teas and a light lunch) for a maximum of 10 people. Should a venue be required a municipal venue can be arranged at no cost.

It is important to note that while some elements have been suggested i.e. a full day workshop; we welcome creative or innovative methodologies within your proposals to ensure that the BMZ project evaluation is carried out in a sound and rigorous manner with useful outputs.

4. The following outputs are required:

- A comprehensive BMZ Project evaluation report that addresses the items listed under 'Scope of Works' above.
- An easy to read 2-3 page information sheet that provides an overview of key learning's and pictures/graphics from the BMZ Project that would be relevant to projects of a similar cross-sectoral nature (e.g. for MILE, SKEW, City of Bremen)

5. Timeframes

A draft version of the required outputs from the evaluation must be completed by **15th of November 2016** for review by the project team (Durban and Bremen). A presentation of the evaluation findings will be required when the funders are in Durban. This will either take place in the last week of November or the first week of December. - 1.3. Regulation 9.(3) prescribes that where there is no designated sector, a specific bidding condition may be included, that only locally produced services, works or goods or locally manufactured goods with a stipulated minimum threshold for local production and content, will be considered.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.

- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.

- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
